

PENN STAINLESS PRODUCTS TANAKA PLATE LASER CUTTING SYSTEM

PSP's plate laser is an important complement to our existing plate processing capabilities. In conjunction with the new Herr-Voss Stamco Heavy Gauge Cut-to-Length line, the Tanaka Plate Laser System gives PSP the ability to deliver parts up to 120 inches wide and in excess of 40 feet long. With the system's precision performance and massive cutting envelope, we can produce high-quality, large-scale jobs with quick delivery.
