

PENN STAINLESS PRODUCTS DYNAMIC WATERJET PLATE CUTTING SYSTEMS

Penn Stainless Products' expansive plate processing capabilities include multiple dynamic waterjet cutting stations to precision-cut heavy plate in excess of 8 inches thick. Even the most complex part geometry can be precision-cut with our dynamic waterjet technology, with no heat-affected zone, minimal taper, and superior surface finish. Our 10-foot x 20-foot cutting envelope maximizes part size and minimizes secondary operations.

- **DYNAMIC WATERJET TECHNOLOGY PRODUCES PRECISION GEOMETRY**
- **CAN PROCESSES STAINLESS PARTS THOROUGH 8-1/2" THICK**
- **THREE WATERJET TABLES ENSURE REDUNDANCY AND FAST TURNAROUND TIMES**
- **EXPANSIVE CUTTING ENVELOPE OF 10' WIDE X 20' LONG**
