

PENN STAINLESS EXPORT SERVICES

Penn Stainless Products is ready to process and ship your order to any region of the world. We have the documentation, packaging and shipping expertise to deliver your stainless steel materials safely to your overseas facility. Here is a brief overview of the value added services we offer to our international customers:

EXPORT PACKING:

If your order does not arrive in good condition, time and resources are lost. We provide world-class packaging for land, sea and air – to ensure your product arrives intact. Specifically, we:

- Maintain IPPC packaging standards to ensure that your shipment meets international treaty obligations.
- Offer boxing and crating for sea or land.

DOCUMENTATION:

Documentation is an important part of the export process. We supply you or your freight forwarder with:

- Commercial Invoices
- Country of Origin Certificates (notarized as needed)
- NAFTA and other Free Trade Agreement documentation
- Other documentation per request

LOGISTICS:

We use INCO 2010 Terms when shipping. We work with our international customers to provide logistics support as needed. We can quote from Ex-Works (EXP) to Cost, Insurance & Freight to (CIF) to your nearest port. We can use your freight forwarder or we can handle the entire logistics process.

FINANCE & CREDIT:

We work with our customers to offer advantageous credit terms for international shipments. We can:

- Offer open account terms if qualified
- Process prepayments either by bank wire transfer, check or credit card
- Ship against documents such as letters of credit or drafts

EXPERTISE:

We have dedicated, experienced staff to support specialized requests, complete your documentation, and provide expediting and logistics support. Tell us what you need, and we will work tirelessly to meet your requirements.
